## BRANDING *of products*

### EMBROIDERY

Towels with embroidered logos perfectly complement the corporate style of companies, beauty salons, SPA centers, sports clubs, and fitness centers. We use high-quality materials for embroidery. The thread color is selected individually to match your logo. If care instructions are followed, the embroidery on the towels remains vibrant for a long time, with threads that do not fade or change color when using laundry detergents.

### JACQUARD – EMBOSSED

Jacquard logo application is created in the structure of the towels by alternating high and low piles. This type of logo placement allows the logo or image to be applied across the entire towel surface without affecting the cost. It withstands washing very well and retains its appearance.

### LOGO IN BORDER

Logo in Border – a logo made with durable polyester threads that has a smooth (non-terry) structure and is applied on the border (or stripe) of the towel. This method allows for a multicolor logo and is suitable for complex designs. The polyester threads used for the logo are highly resistant to heat and light, ensuring that the logo retains its shape and color even after frequent washing. Up to 4 colors can be used in the logo.
